

International Symposium

7. - 9. October 2010

Marburg, Germany

Aula der Alten Universität
Lahntor 3, 35037 Marburg

Contact:

Organizers:

Prof. Dr. Thomas Budde

Institute of Physiology I
University of Münster
Robert-Koch-Str. 27a
D-48149 Münster

Tel: +49-251-8355533
Fax: + 49-251-8355551
Email: tbudde@uni-muenster.de

Prof. Dr. Jürgen Daut

Institute of Physiology and Pathophysiology
University of Marburg
Deutschhausstr. 2
D-35037 Marburg

Tel: +49-6421-2866494
Fax: +49-6421-2868960

OF FOR 1086

Thursday, 7th Oct.

Aula der Alten Universität, Lahntor 3, 35037 Marburg

15:15 Opening remarks

15:30 Steve Goldstein (Univ. of Chicago)
Keynote:
SUMO regulates TASK channels in cerebellar granule neurons via K_{2P1}

16:30 Gyorgy Panyi (Univ. of Debrecen, Hungary)
Keynote:
Ion channels in lymphocytes: physiological roles and therapeutic targeting

18:00 Welcome reception / Get together

20:00 Speakers-Dinner

Friday, 8th Oct.

Aula der Alten Universität, Lahntor 3, 35037 Marburg

Invited speakers

8:40 Alistair Mathie (Univ. of Kent)
Regulation and gating of TASK and TREK K_{2P} channels

9:20 Douglas Bayliss (Univ. of Virginia)
TASK channels: expression, regulation and physiological roles

10:00 Donghee Kim (Rosalind Franklin Univ. of Medicine and Science)
TASK and TREK in excitable cells

Friday, 8th Oct.

Aula der Alten Universität, Lahntor 3, 35037 Marburg

Coffee break

11.00 Nicholas Franks (Imperial College, London)
TASK potassium channels and general anaesthetics

11.40 Florian Lesage (CNRS, Sophia Antipolis, France)
Direct and indirect regulations of TREK and TWIK channel activities

12.20 Erhard Wischmeyer (Univ. of Würzburg)
TRESK and TREK-1 as potential therapeutic targets

Lunch break

14:00 Marc Borsotto (CNRS, Sophia Antipolis, France)
Spadin, a Sortilin-Derived Peptide, Targeting Rodent TREK-1 Channels: A New Concept in the Antidepressant Drug Design

14:40 Bill Wisden (Imperial College, London)
 K_{2P} channels and neuronal homeostasis

15:20 Stephen Brickley (Imperial College London)
Thinking about the nodal leak: two-pore channels and action potential repolarisation

Coffee break

16:20 Jürgen Daut (Univ. of Marburg)
Intracellular traffic of TASK channels

17:00 Keith Buckler (Univ. of Oxford)
Background potassium channels, metabolism and oxygen sensing

18:00 **Refreshment** until 19.00

20:00 Social event

Saturday, 9th Oct.

Kleiner Hörsaal, Instituts f. Physiologie u. Pathophysiologie, Deutschhausstr. 2

Progress report of FOR 1086

9:00 Thomas Baukrowitz (Jena)
Pore structure and gating in K_{2P} channels probed by high affinity pore blockers and scanning mutagenesis

9:40 Thomas Budde / Sven Meuth (Münster, Würzburg)
The modulation of TASK channels in thalamic neurons

Coffee break

10:40 Niels Decher / Jürgen Daut (Marburg)
The role of TASK-1 channels in the heart

11:20 Richard Warth (Regensburg)
The adrenal phenotype of the TASK-3 knockout mouse

Lunch and end of Symposium

Support and sponsors:

- Institute of Physiology I
